

TerraTop

Specifications

Product Name: TerraTop **Modern Terrazzo Flooring**

DESCRIPTION:

TerraTop –Terrazzo Overlayment, is a pre-mixed, polymer fortified cementitious topping, containing marble, granite, crushed stone, onyx, and glass chips. The mix is poured in place, cured, ground, and smooth polished to expose the aggregates.

USES

TerraTop – Terrazzo Overlayment is suitable for use as a topping in interior floors & walls ranging from residential to heavy commercial and industrial buildings.

ADVANTAGES:

- Unequaled longevity and durability.
- Quick and Easy to apply.
- Minimum need for maintenance.
- Wide range of application, 6mm to 30mm.
- Wide choice of matrix color and decorative aggregates.
- Unlimited design possibilities.

SURFACE PREPARATION

TerraTop can be applied on an array of bases. It is very compatible with new concrete, cement based tiles, and masonry. All bases should be sufficiently rigid, clean of any surface contamination that may prevent good adhesion. Dense, smooth surfaces, and those retaining excessive amounts of form release agent, can cause delamination. Any painted or coated surfaces should be sandblasted or pressure washed to remove existing coating. The base should be straight, true to line, and plane. Misalignment of substrate and cracks should be corrected with a patching compound such as PatchCrete101, Multi-Use Repair Mortar avoiding excessive and variable thickness within a single panel. Apply a coat of BondCrete, Bonding Slurry (1:1) and leave to cure overnight.

MIXING

Mixing should be completed by mechanical method preferably with a paddle type blender. Drill mounted jiffy type mixers can also be used. Always add clean potable water first. Mixing duration should occur within 3 to 5 minutes to insure proper color and material dispersion within mix. Generally 6-7 liters of clean water are needed per 35 kg bag of TerraTop.

COVERAGE

On average 2.2 kg of TerraTop per square meter per 1 mm thickness is dominant.

PACKAGING

35 Kg Bags

Available in Many Colors & Aggregates
